Portable log analysis tool for isolated network.

SIH PS ID-SIH25235

National Technical
Research
Organizations (NTRO)

1. The Core Idea: Offline Security

A self-contained **USB tool** that provides **secure, offline log collection** in sensitive **air-gapped/isolated networks**. This solution transforms any USB drive into a "**Portable SOC-in-a-USB.**"

Key Features

2. System Architecture & Technology

A. Essential Technology Stack

Programming: Python (Cross-platform scripting) and OS-specific **Bash/PowerShell**.

Hardware: USB drive (GB) with **autorun** capability.

Tools: Integrated **YARA rules** for anomaly detection and SQLite for local storage.

3. Impact & Risk

A. Key Benefits

IT Teams: Simplifies monitoring and centralized review.

Economic: Lowers SOC costs and reduces downtime.

Compliance: Facilitates easier verification & reporting.

B. Mitigation Strategies

Compatibility: Cross-platform testing to ensure reliability.

Security: Enforce **Secure USB Handling** (read-only mode, signatures).

Usability: Implement a **User-friendly GUI** with alerts to prevent errors.

Resilience: Use **Key Management** with backup options to prevent data loss.
